

AQIPETS-001 INSERT

Model AQIPETS-001 Miniatures Insert Kit for Arcadia Quest: Inferno™ Pets Box

Complete insert kit providing storage for miniatures, cards, and map tiles

General Construction Tips

- 1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.
- 2) Our inserts are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.
- 3) Keep some paper towels handy for cleanup during build.
- 4) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored.
- 5) Check the build diagram included in the package for reference, including all parts, as well as build tips specific to this insert.
- 6) Always dry fit pieces first to ensure a good fit and to better understand how the kit goes together.
- 7) Allow your finished insert to dry overnight.
- 8) You can optionally sand and even stain your insert.
- 9) Don't hesitate to reach out to us if you have questions!

Unlike many of our inserts, this is not a licensed insert. All trademarks/marks are the property of their respective owners.

Kit Plates

Build Instructions

Please reference the diagrams to understand how each component goes together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure proper a fit and finish, especially in card and rail areas.

Building the Small Pets Tray

- 1) Place base **(A)** down on your workspace in the orientation noted to the right.
- 2) Next, apply glue to the bottom of each inner wall **(B)** and connect to base **(A)**.
- 3) Next, apply glue to the end tabs on one side of the inner walls **(B)**, the bottom of the side wall **(C)**, and then connect to base **(A)**. Repeat on the other side.
- 4) Next, apply glue to the bottom and end tabs of rear wall **(B)** and connect.
- 5) Next, place glue on the bottom and end tabs of front wall **(B)** and connect.
- 6) Finally, place glue on the end tabs of each divider **(D)** (not shown in the image) and connect.

Building the Large Pets Tray

- 1) Place base (E) down on your workspace in the orientation noted to the left.
- 2) Next, apply glue to the bottom of each inner wall (F) and connect to base (E).
- 3) Next, apply glue to the end tabs on one side of the inner walls (F), the bottom of the rear wall (G), and then connect to base (E). Repeat for front wall (G).
- 4) Next, apply glue to the bottom and end tabs of side wall (H) and connect. Repeat for the other side wall (H).
- 5) Finally, place glue on the end tabs of each divider (I) and connect.

Building the Large Minis/Card Tray

- 1) Place base (**J**) down on your workspace in the orientation noted to the right.
- 2) Next, apply glue to the lower end tabs of each inner wall (**L**) and connect to center wall (**K**).
- 3) Next, apply glue to upper end tab of card divider (**M**) and connect to the structure you built in step #2.
- 4) Next, apply glue to the bottom of the structure built in steps #2 and #3 and connect to base (**J**).
- 5) Next, apply glue to the end tabs of center wall (**K**) and the bottom of both side walls (**O & N**) and connect.
- 6) Next, apply glue to the end tabs of each inner wall (**L**) and the bottom of rear wall (**R**) and connect.
- 7) Next, apply glue to the end tab of card divider (**M**) and the bottom of front wall (**Q**) and connect.
- 8) Finally, place glue on the end tabs of tray support (**P**) and connect to card divider (**M**). Repeat for the other tray support (**P**) and connect to side wall (**O**).
- 9) You may place a couple of dividers in the card area to ensure a perfect fit after the tray has had 5 – 10 minutes to dry.

Kit Plates

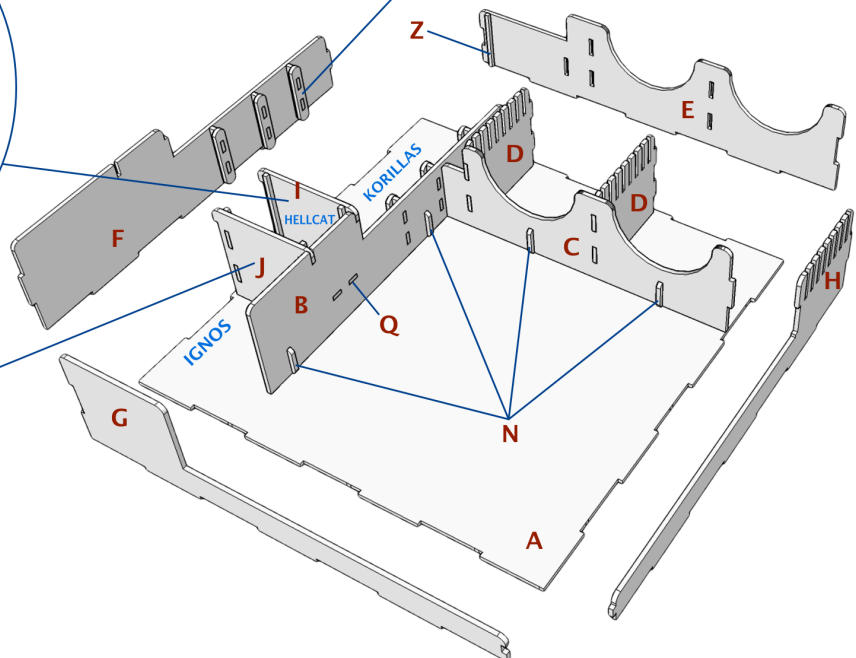

Build Instructions

Please reference the diagrams to understand how each component goes together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card and rail areas.

Building the Base Insert

- 1) Place base (A) down on your workspace in the orientation noted below.
- 2) Next, place glue on the left end tabs of inner card wall (C) and connect to inner minis wall (B).
- 3) Next, place glue on left end tabs of divider walls (D) and connect both to inner card wall (C).
- 4) Next, place glue on the bottom of the structure built in the previous steps and connect to base (A).
- 5) Next, place glue on the right end tabs of each divider wall and the bottom and left end tabs of rear wall (E) and connect to the structure.
- 6) Finally, place glue on the end tabs of mini support (Q) and place it inside the compartment on the left side of minis wall (B). The reference on the image does not show the inside of the compartment, but (Q) marks the spot.
- 7) Next, put glue on the left end tab and bottom of side mini wall (F) and connect.
- 8) Next, place glue on the right end tabs and bottom of front wall (G) and connect.
- 9) Next, place glue on the right end tabs and bottom of side wall (H) and connect.
- 10) Next, place glue on the tabs of each of the four tile stops (N) and connect.
- 11) Next, place glue on the tabs of support (O) and connect rail (P), then connect to side mini wall (F). Repeat twice more. (See Figure #1 for rail assembly image)
- 12) Next, place glue on the tabs of support (O) and connect rail (P), then connect to inner minis wall (B), opposite the ones placed in step #10. Repeat twice more. (See Figure #1 for rail assembly image)
- 13) Next, construct the two-sided minis divider according to Figure #2. Note that this divider has 2 rails (X, Y) on one side and one rail (Z) attached on the other side. (See Figure #2). Then place glue on the bottom and top tabs and attach to the structure.
- 14) Next, construct the one-sided minis divider according to Figure #3. Then place glue on the bottom and top tabs and attach.
- 15) Finally, place glue on the tab of rail (Z) and connect to rear wall (E).

Congratulations! You have completed the construction of your new storage insert. If you have any questions/ concerns, don't hesitate to contact us. Finally, please take a moment to review your new solution on our website.
