OTHERS-001 STORAGE SOLUTION

Miniatures Insert Kit for The Others: 7 Sins™ Base Box
Complete insert kit providing storage for miniatures, cards, map tiles, and tokens

Construction Tips

1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.

2) Our inserts are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.

3) Keep some paper towels handy for cleanup during build.

4) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored.

5) Check the build diagram included in the package for reference, including all parts, as well as build tips specific to this insert.

6) Always dry fit pieces first to ensure a good fit and to better understand how the kit goes together.

7) Allow your finished insert to dry overnight.

8) You can optionally sand and even stain your insert.

9) Don't hesitate to reach out to us if you have questions!

GO 7 GAMING
Made in the USA
Build Instructions

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card and rail areas.

Building the Shallow Token Tray

Note: ensure the side walls (**C**) are oriented in the same position so that the dividers slots align.

1) Place base (**A**) down on your workspace in the orientation noted to the right.
2) Next, apply glue to the bottom and end tabs of front wall (**B**) and connect to base (**A**).
3) Next, place glue on the bottom of side wall (**C**) and connect to base (**A**).
4) Next, apply glue to the bottom and end tabs of rear wall (**B**) and connect to base (**A**).
5) Next, place glue on the bottom of side wall (**C**) and connect to base (**A**).
6) Next, place glue on the end tabs of the dividers (**D**) and connect to the tray.
**7)** Finally, place glue on the end tabs of cross dividers (**Z**) and connect to the tray.

Building the Deep Token Tray

Note: ensure the side walls (**H**) are oriented in the same position so that the dividers slots align.

1) Place base (**E**) down on your workspace in the orientation noted to the left.
2) Next, apply glue to the bottom of divider (**F**) and connect to base (**A**).
3) Next, apply glue to the bottom of both token dividers (**G**) and connect to base (**A**).
4) Next, apply glue to the end tabs of dividers (**F, G, G**) and the bottom of side wall (**H**) and connect.
5) Next, apply glue to the end tabs of dividers (**F, G, G**) and the bottom of the other side wall (**H**) and connect.
6) Next, place glue on the bottom and end tabs of front wall (**I**) and connect.
6) Finally, place glue on the bottom and end tabs of rear wall (**J**) and connect.

**Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card and rail areas.**

Building the Small Card Tray

1) Place base (**A**) down on your workspace in the orientation noted to the right.
2) Next, apply glue to the bottom of side wall (**B**) and connect.
3) Next, place glue on the bottom and end tabs of end wall (**C**) and connect.
4) Next, apply glue to the bottom of side wall (**B**) and connect.
5) Finally, place glue on the bottom and end tabs of end wall (**C**) and connect.
**6)** After a few minutes, place a couple of dividers in the tray to ensure a perfect fit.

Building the Minis Tray

1) Place base (**D**) down on your workspace in the orientation noted to the left.
2) Next, apply glue to the bottom of all dividers (**E**) and connect to base (**D**).
3) Next, apply glue to the end tabs of dividers (**E**) and the bottom of wall (**F**) and connect.   Repeat for the other wall (**F**).
4) Finally, apply glue to the end tabs and bottom of wall (**G**) and connect.   Repeat for the other wall (**G**).
5) After the glue dries, you can seat the small dividers (**H**) by placing small dabs of glue on the bottom of each divider and then placing them in each slot.

Note: you will need a double space for one of the minis so you should not place one of the dividers, creating a double storage space in the tray.
Build Instructions

The other two part E are on plate #5

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card and rail areas.

Building the Base Insert

1) Place glue on the left end tabs of the three short dividers (**E**) and connect to long inner divider wall (**B**).
2) Next, place glue on the left end of short inner divider wall (**D**) and connect to cross divider wall (**C**).
3) Next, place glue on the left end tabs of cross divider wall (**C**), the right end tabs of the three short dividers (**E**) and connect to the two structures together.
4) Next, place glue on the right end tabs of inner mini divider wall (**F**) and connect to the structure.
5) Next, place glue on the right end tabs of inner tile wall (**G**) and connect to the structure.
6) Next, place base (**A**) down on your workspace in the orientation noted below.
7) Next, place glue on the bottom tabs of the structure and connect to base (**A**).
8) Next, place glue on the bottom tabs of short wall (**I**) and connect to base (**A**).
9) Next, place glue on the right end tabs of long inner divider wall (**B**) and short inner divider wall (**D**) and the bottom of outer wall (**L**) and connect to base (**A**).
10) Next, place glue on the right end tabs of cross divider wall (**C**) and the bottom and end tabs of outer wall (**K**) and connect to base (**A**).
11) Next, place glue on the left end tabs of long inner divider wall (**B**) and the bottom of outer wall (**J**) and connect to base (**A**).
12) Next, place glue on the left end tabs of inner mini divider wall (**F**) and short wall (**I**) and the bottom and end tabs of outer wall (**H**) and connect to base (**A**).

Building the Base Insert (continued)

12) Next, move your tray into the orientation pictured on the left.
13) Next, place glue on the bottom and side tabs of card wall (**M**) and carefully place in the structure.
14) Next, place glue on the end tabs of tall mini divider (**N**) and place.
15) Next, place glue on the end tabs of short mini divider (**O**) and place. Repeat for the second short mini divider (**O**).
16) Finally, place glue on the tabs of the tile supports (**P**) and place them as illustrated on the left.

Congratulations! You have completed the construction of your new storage insert. If you have any questions/ concerns, don't hesitate to contact us. Finally, please take a moment to review your new solution on our website.
