

OTHSML-001 INSERT

Check out our line of Bit Boxes. We have a multitude of designs to fit every need. We offer two sizes and internal compartment configurations from two – eight compartments. (BB-004 pictured; lid not shown)

Plus, our bit boxes are designed to fit inside the card lanes of most of our inserts, so you will always know where your bits are! Let Go7 help you store your bits in style.

Go7 Gaming Heritage Line Inserts

This line of inserts utilizes acrylic dividers and includes a base for the insert, in most cases. These inserts are structurally designed to provide a rock-solid enclosure to protect your cards and bits for a lifetime. Of course, they cost more to produce and to ship. Also, because of the inclusion of the base, they are a little easier to build. The insert base provides an almost foolproof platform for building.

Go7 Gaming Value Line Inserts

Our Value Line inserts lack bases, but provide additional structural support via strategically placed supports. Also, we use wood dividers instead of acrylic dividers. With these changes, the cost of Value Line inserts is significantly less than our Heritage Line inserts, as well as competitor's equivalent inserts. Plus, we have designed our Value Line inserts to fit into less expensive USPS flat-rate envelopes. This is a huge win for U.S. customers and will also reduce the shipping costs for our international customers.

HERITAGE LINE

THIS INSERT PROVIDES FLEXIBLE STORAGE FOR THE OTHERS: 7 SINST™ COMPONENTS FROM THE SONS OF RAGNAROK/MEN OF FAITH AND IS DESIGNED TO BE PLACED INSIDE ONE OF THESE TWO BOXES.

ESTIMATED CONSTRUCTION TIME: 15 MINUTES

MATERIALS REQUIRED: GLUE, MASKING/PAINTER'S TAPE

**KIT INCLUDES: (1x) OTHSML-001 INSERT KIT
(8x) DIVIDERS**

AGE 14+
NOT A CHILDREN'S TOY

**GO
GAMING**
Made in the USA

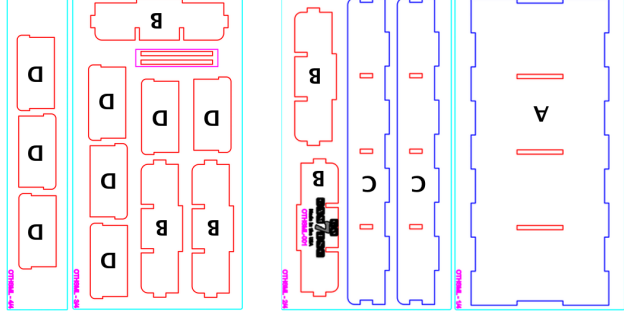

General Construction Tips

- 1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.
- 2) Our inserts are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.
- 3) Keep some paper towels handy for cleanup during build.
- 4) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored. The small, thin sticks on your plates are for glue removal.
- 5) Always dry fit pieces first to ensure a good fit and to better understand how the kit goes together before gluing!
- 6) Allow your finished insert to dry overnight.
- 7) Don't hesitate to reach out to us if you have questions!

Kit Plates

Building the Small Minis Tray

- 1) Place base (A) down on your workspace in the orientation noted above.
- 2) Next, apply glue to the bottom of the 3 inner walls (B) and connect to base (A).
- 3) Next, place glue on the right end tabs of all inner walls (B) and on the bottom of side wall (C) and connect to base (A). Repeat on the left side.
- 4) Finally, apply glue to the bottom and end tabs of end wall (B) and connect to base (A). Repeat on the other side.

Placing the Dividers

Once you've decided how you wish to store all of your components and what size compartments you will need in this tray, place a few small dabs of glue on the bottom of the provided dividers (D) and place your dividers in the tray.

Congratulations! You have completed the construction of your new insert. Allow your insert to dry overnight, insert dividers as needed, place it in your expansion box, and enjoy your new storage solution. If you have any questions/concerns, don't hesitate to contact us. Finally, please take a moment to review your new insert on our website.
