

RB-001 STORAGE SOLUTION

Miniatures Insert Kit for Rum & Bones: Second Tide™ Base Box
Complete insert kit providing storage for miniatures, cards, ship boards, and tokens

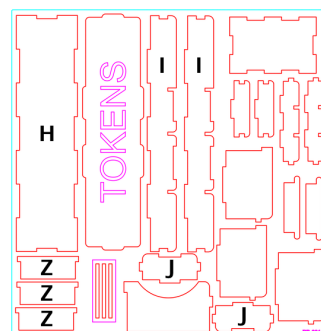

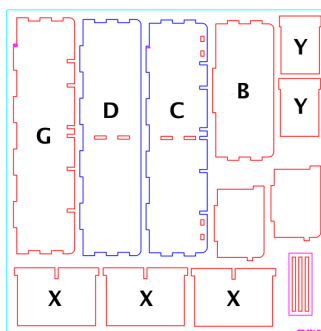

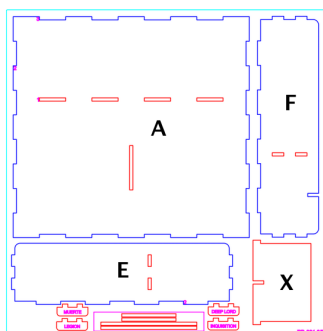

Construction Tips

- 1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.
- 2) Our inserts are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.
- 3) Keep some paper towels handy for cleanup during build.
- 4) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored.
- 5) Check the build diagram included in the package for reference, including all parts, as well as build tips specific to this insert.
- 6) Always dry fit pieces first to ensure a good fit and to better understand how the kit goes together.
- 7) Allow your finished insert to dry overnight.
- 8) You can optionally sand and even stain your insert.
- 9) Don't hesitate to reach out to us if you have questions!

Build Instructions

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card and rail areas.

Building the Large Minis Tray

The large minis tray provides two large bins for your deckhands and bosuns, as well as room for the sea monster minis. If you don't have the sea monster minis, you can just split this section into two parts and store your bosuns separate from your deckhands. Dividers (X, Y) are used to create small compartments in this tray.

Note: Pieces (A, C, E, G) each have the numbers etched into them (1-3). These pieces should connect at the points where the numbers meet. This will ensure your walls are oriented correctly.

- 1) Place base (A) down on your workspace in the orientation noted to the right.
- 2) Next, apply glue to the side tabs on the right side of inner wall (B) and connect to inner wall (C).
- 3) Next, place glue on the bottom of the structure (B, C) and connect to base (A).
- 4) Next, apply glue to the end tabs of inner wall (C).
- 5) Next, place glue on the bottom of outer wall (E) and connect to base (A).
- 6) Next, place glue on the bottom of outer wall (F) and connect to base (A).
- 7) Next, place glue on the end tabs and bottom of outer wall (D) and on the end tabs of inner wall (B) and connect to base (A).
- 8) Finally, place glue on the end tabs and bottom of outer wall (G) and connect to base (A).
- 9) Once your tray dries, you may insert the dividers in the figure #1 area.

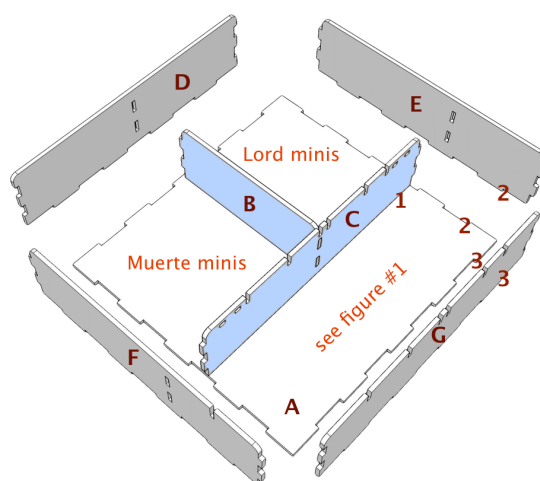

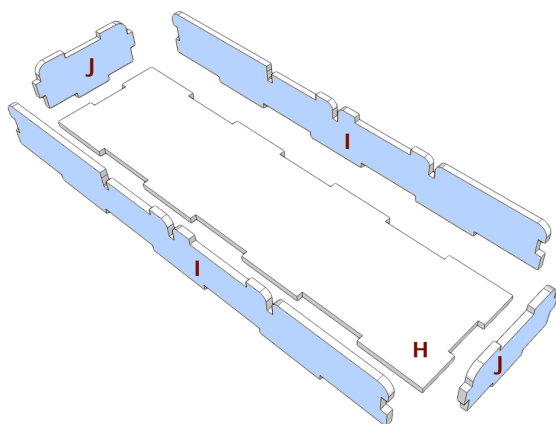

Figure #1

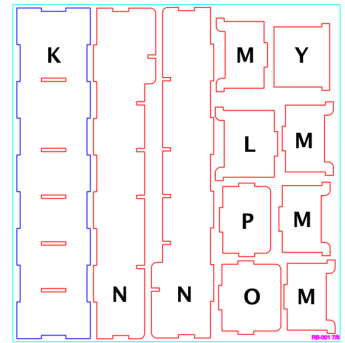

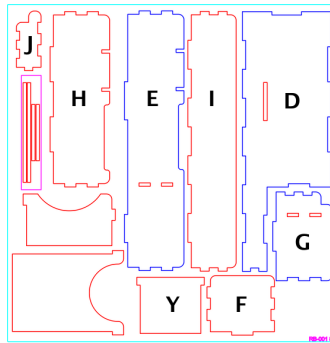

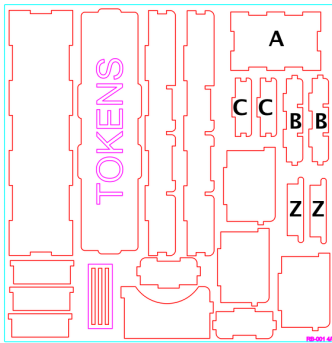

Building the Large Token Tray

This tray is used to store damage and coin tokens and can be used during play.

- 1) Place base (H) down on your workspace in the orientation noted to the left.
- 2) Next, apply glue to the bottom of side wall (I) and connect.
- 3) Next, place glue on the bottom and end tabs of end wall (J) and connect.
- 4) Next, apply glue to the bottom of side wall (I) and connect.
- 5) Finally, place glue on the bottom and end tabs of end wall (J) and connect.

This tray provides 2 - 4 compartments for token storage. If you have the plastic or metal coins, you may opt to use half the tray for just coins and then split the other side for the 1/3 point damage tokens.

Build Instructions

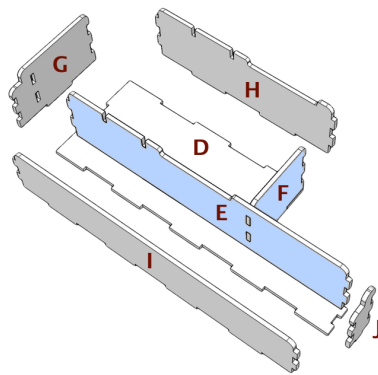

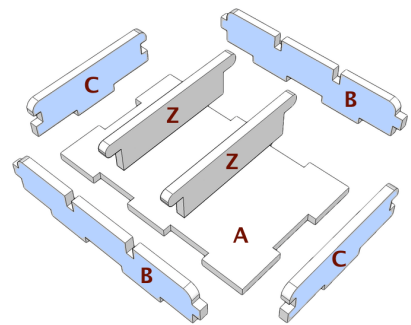

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card and rail areas.

Building the Small Token Tray

The small token tray provides three compartments to store your condition and activation token. This tray is stored inside the "L" tray below.

- 1) Place base (A) down on your workspace in the orientation noted to the right.
- 2) Next, apply glue to the bottom of side wall (B) and connect.
- 3) Next, place glue on the bottom and end tabs of end wall (C) and connect.
- 4) Next, apply glue to the bottom of side wall (B) and connect.
- 5) Next, place glue on the bottom and end tabs of end wall (C) and connect.
- 6) Finally, place glue on the bottom of dividers (Z) and place in the tray.

Building the "L" Tray

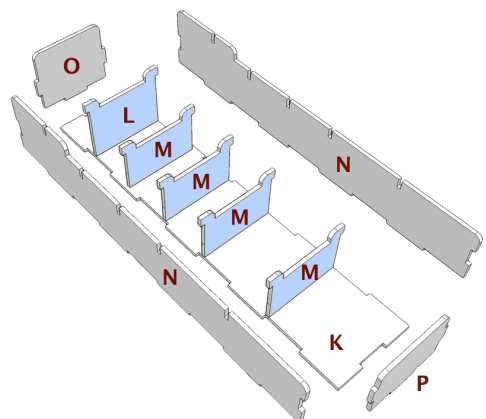

The "L" tray is designed to store two small hero minis, the hero bases, and 30 dice.

- 1) Place base (D) down on your workspace in the orientation noted to the left.
- 2) Next, apply glue to the left end tabs of outer wall (F) and connect to inner long wall (E).
- 3) Next, place glue on the bottom and end tabs of the structure and connect to base (D).
- 4) Next, apply glue to the bottom of end wall (G) and connect to base (D).
- 5) Next, place glue on the bottom and end tabs of end wall (J) and connect.
- 6) Next, place glue on the bottom and end tabs of long wall (I) and connect.
- 7) Next, place glue on the end tabs and bottom of outer wall (H) and connect.
- 8) Finally, place dividers (Y) in the tray to ensure a perfect fit. You can glue them later, if needed.

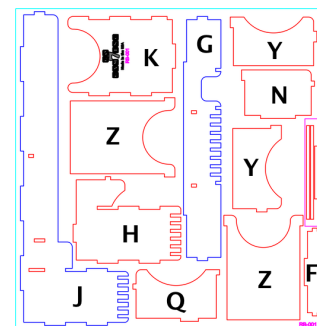

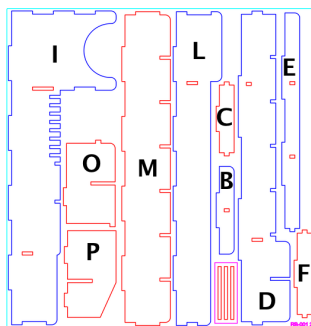

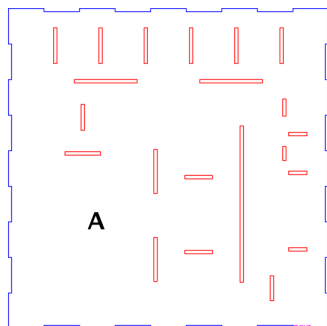

Building the Long Hero Minis Tray

The long hero minis tray provides storage for six large hero minis.

- 1) Place base (K) down on your workspace in the orientation noted to the right.
- 2) Next, apply glue to the bottom of all dividers (L, M) and connect to base (K).
- 3) Next, apply glue to the end tabs of dividers (L, M) and the bottom of wall (N) and connect. Repeat for the other wall (N).
- 4) Next, apply glue to the end tabs and bottom of end wall (O) and connect. Repeat for the other end wall (P).

Build Instructions

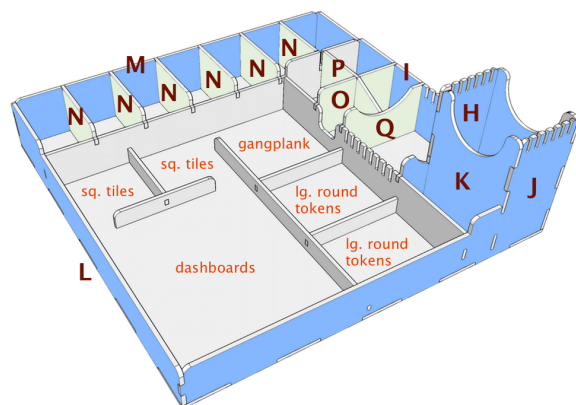

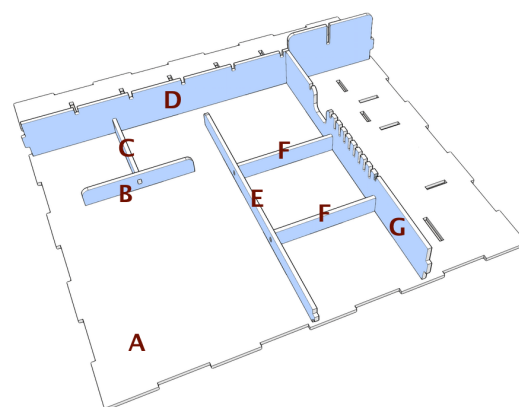

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card and rail areas.

Building the Base Insert

The base insert is designed to store the small ship boards, large/small minis, dashboards, small/large cards, various small tiles, and larger tokens. The large ship board, manual, and score dashboard fit on top of the insert.

- 1) Place base (A) down on your workspace in the orientation noted to the right.
- 2) Place glue on the left/right end tabs of small wall (C), connect to cross wall (B), and then connect to inner wall (D).
- 3) Next, place glue on both ends of cross wall (F) and connect to long inner wall (E). Repeat for the other cross wall (F).
- 4) Next, connect the (E, F) structure to inner wall (G).
- 5) Next, place glue on the upper end tabs of inner wall (G) and connect to inner wall (D).
- 6) Next, place glue on the bottom of the structure and connect to base (A).

Building the Base Insert (continued)

- 7) Next, place glue on the right end tabs of divider wall (H) and connect to outer wall (I).
- 8) Next, place glue on the bottom and end tabs of the structure (H, I) and connect to base (A).
- 9) Next, place glue on the right end tabs of divider wall (K) and connect to outer wall (J).
- 10) Next, place glue on bottom and ends tabs of the structure (K, J) and connect to base (A).
- 11) Next, place glue on the bottom and side tabs of outer wall (L) and connect.
- 12) Next, place glue on the bottom and side tabs of outer wall (M) and connect.
- 13) Next, place glue on the end tabs of the mini dividers (N) and place in the insert.
- 14) Next, place glue on the bottom tabs of divider wall (O) and cross divider wall (P) and place.
- 15) Finally, place glue on the side tabs of the divider wall (Q) and place.

Congratulations! You have completed the construction of your new storage insert. If you have any questions/concerns, don't hesitate to contact us. Finally, please take a moment to review your new solution on our website.
