

Check out our line of Bit Boxes. We have a multitude of designs to fit every need. We offer two sizes and internal compartment configurations from two – eight compartments. (BB-004 pictured; lid not shown)

Plus, our bit boxes are designed to fit inside the card lanes of most of our inserts, so you will always know where your bits are! Let Go7 help you store your bits in style.

## Go7 Gaming Heritage Line Inserts

This line of inserts utilizes acrylic dividers and includes a base for the insert, in most cases. These inserts are structurally designed to provide a rock-solid enclosure to protect your cards and bits for a lifetime. Of course, they cost more to produce and to ship. Also, because of the inclusion of the base, they are a little easier to build. The insert base provides an almost foolproof platform for building.

## Go7 Gaming Value Line Inserts

Our Value Line inserts lack bases, but provide additional structural support via strategically placed supports. Also, we use wood dividers instead of acrylic dividers. With these changes, the cost of Value Line inserts is significantly less than our Heritage Line inserts, as well as competitor's equivalent inserts. Plus, we have designed our Value Line inserts to fit into less expensive USPS flat-rate envelopes. This is a huge win for U.S. customers and will also reduce the shipping costs for our international customers.
