RSUN-001 STORAGE SOLUTION

Miniatures Insert Kit for Rising Sun™ Base Game Box Complete insert kit providing storage for miniatures, cards, and tokens

Construction Tips

- 1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.
- 2) Our inserts are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.
- 3) Keep some paper towels handy for cleanup during build.
- 4) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored.
- 5) Check the build diagram included in the package for reference, including all parts, as well as build tips specific to this insert.
- 6) Always dry fit pieces first to ensure a good fit and to better understand how the kit goes together.
- 7) Allow your finished insert to dry overnight.
- 8) You can optionally sand and even stain your insert.
- 9) Don't hesitate to reach out to us if you have questions!

NOT A CHILDREN'S TOY

AGE 14+

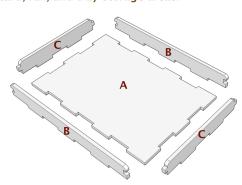

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray storage areas.

Building the Turtle Clan Extras Tray

This small tray is used to store clan extras inside the Turtle clan tray.

- 1) Place base (A) down on your workspace in the orientation noted to the right.
- 2) Next, apply glue to the bottom of long wall (B) and connect to base (A).
- 3) Next, apply glue to the side tabs and bottom of end wall (C) and connect. Repeat for the other end wall (C).
- 4) Finally, apply glue to the bottom of long wall (B) and connect.

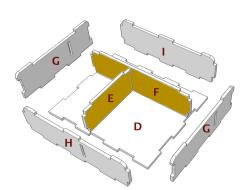

Building the Token Tray

This tray provides storage for coins, Ronin tokens, and war number tokens.

2) Next, apply glue to the right side tab of inner splitter (E) and connect to divider wall (F).

- **3)** Next, place glue on the bottom and side tabs (x3) of the structure you just built in step #2 and connect to base (**D**).
- 4) Next, apply glue to the bottom of outer wall (G) and connect. Repeat on the other side with the other outer wall (G).
- 5) Next, apply glue to the bottom and side tabs of outer wall (H) and connect.
- ${\bf 6)}$ Finally, apply glue to the bottom and side tabs of outer wall ${\bf (I)}$ and connect.
- 7) Once the glue on your tray has had a few minutes to set, place the lid on the tray and allow it to dry.

Building the Short Clan Trays

These three (3) trays are used to store the clan minis and extras for the Bonsai, Koi, and Lotus clans.

1) Place base (J) down on your workspace in the orientation noted to the right.

2) Next, apply glue to the right side of mini bracket (L) and connect to divider wall (K). Repeat on the other side with mini bracket (M). Note that the etching faces inward for both pieces.

3) Next, apply glue to the bottom and side tabs of the structure you built in step #2 and connect to base (J).

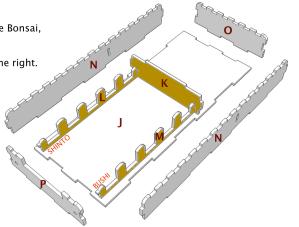

4) Next, place glue on the bottom of outer wall (**N**) and connect. Repeat on the other side.

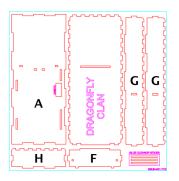

5) Next, apply glue to the bottom and side tabs of end wall (\mathbf{O}) and connect.

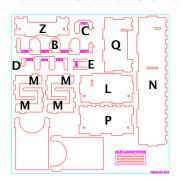

6) Finally, place glue on the bottom and side tabs of end wall (P) and connect.

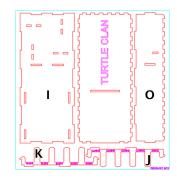

7) Once the glue on your tray has had a few minutes to set, place the lid on the tray and allow it to dry.

8) Repeat steps #1 through #7 to construct the other two small clan boxes.

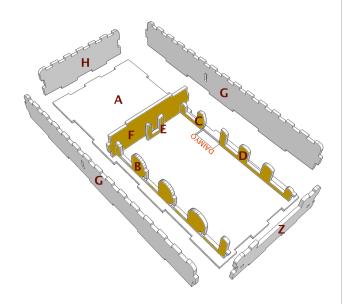

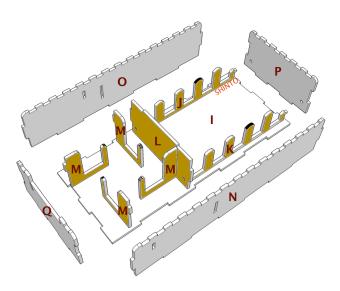

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray areas.

Building the Dragonfly Clan Tray

This tray is used to store the clan minis and extras for the Dragonfly clan. Etched writing on mini brackets should face inward.

- 1) Place base (A) down on your workspace in the orientation noted to the right.
- 2) Next, apply glue to the left side of mini bracket (B) and connect to divider wall (F). Repeat on the other side with mini bracket (C).
- 3) Next, apply glue to the bottom and side tabs of the structure you built in step #2 and connect to base (A).
- **4)** Next, apply glue to the bottom and side tab of mini bracket **(D)** and connect.
- 5) Next, apply glue to the bottom of mini bracket (E) and connect.
- 6) Next, place glue on the bottom of outer wall (\mathbf{G}) and connect. Repeat on the other side.
- 7) Next, apply glue to the bottom and side tabs of end wall (H) and connect.
- 8) Finally, place glue on the bottom and side tabs of end wall (Z) and connect.
- 9) Once the glue on your tray has had a few minutes to set, place the lid on the tray and allow it to dry.

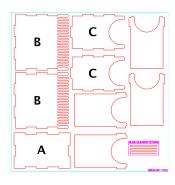

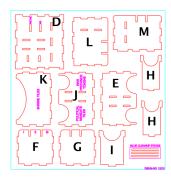

Building the Turtle Clan Tray

This tray is used to store the clan minis and extras for the Turtle clan. Etched writing on mini brackets should face inward.

- 1) Place base (I) down on your workspace in the orientation noted to the left.
- 2) Next, apply glue to the left side of mini bracket (J) and connect to divider wall (L). Repeat on the other side with mini bracket (K).
- **3)** Next, apply glue to the right side tab of stronghold bracket (**M**) and connect to divider wall (**L**).
- 4) Next, apply glue to the bottom and side tabs of the structure you built in steps #2-3 and connect to base (I).
- 5) Next, apply glue to the bottom and side tabs of the other three stronghold brackets (M) and connect to base (I).
- 6) Next, place glue on the bottom of outer wall (N) and connect. Repeat on the other side with outer wall (O).
- 7) Next, apply glue to the bottom and side tabs of end wall (P) and connect.
- 8) Finally, place glue on the bottom and side tabs of end wall (Q) and connect.
- 9) Once the glue on your tray has had a few minutes to set, place the lid on the tray and allow it to dry.

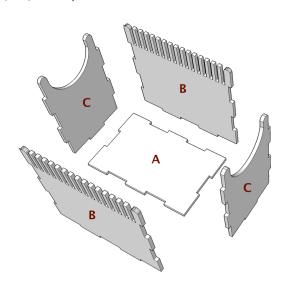

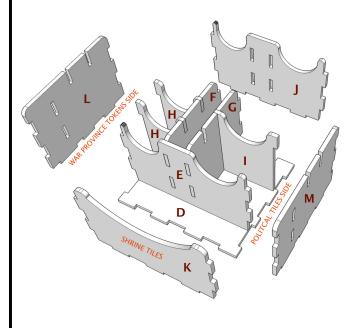

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray areas.

Building the Card Tray

This tray is used to store your cards, sleeved or unsleeved.

- 1) Place base (A) down on your workspace in the orientation noted to the right.
- 2) Next, apply glue to the bottom of long wall (B) and connect to base (A).
- 3) Next, apply glue to the side tabs and bottom of end wall (C) and connect. Repeat for the other end wall (C).
- 4) Finally, apply glue to the bottom of long wall (B) and connect.
- 5) Once the glue on your tray has had a few minutes to set, place a few dividers in the tray to ensure a perfect fit while drying.

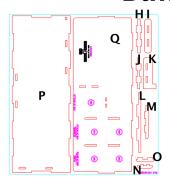

Building the Tall Tile Tray

This tray is used to store the shrine tiles, the political mandate tiles, and war province tokens.

Note: this tray is a little more complicated than most in this kit. You should dry fit everything, including dividers, and ensure that the etching faces the proper direction prior to gluing.

- 1) Place base (D) down on your workspace in the orientation noted to the left.
- 2) Next, apply glue to the left side tabs of inner divider (G) and connect to divider wall (E). Repeat on the other side with inner divider (F) while ensuring the I, II, III etchings face left.
- 3) Next, place glue on the bottom and all side tabs of the structure you built in step #2 and connect to base (**D**).
- 4) Next, apply glue to the side tabs and bottom of divider (I) and connect. Ensure you place this single divider in the proper slot based on whether you have the Kickstarter plastic or retail cardboard tiles.
- 5) Next, apply glue to the side tabs and bottom of the two dividers (H) and connect.
- **6)** Next, apply glue to the bottom of outer wall (L) and connect. Repeat on the right side with outer wall (M).
- 7) Next, place glue on the bottom and side tabs of outer wall (K) and connect.
- **8)** Finally, place glue on the bottom and side tabs of outer wall **(J)** and connect.

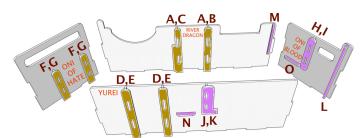

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray areas.

Building the Monster Tray - Rails

The monster tray is designed to store the eight monsters in the base game and also provides a storage area for the token tray.

The monster tray makes use of rail assemblies which are comprised of a support and a rail as illustrated on the right. When building the rail assemblies, make sure you clean all excess glue and note that the rails are always rounded on top. Also, in cases where the rail extends to the base, the rail will actually slide into a notch on the base. This provides additional stability to the finished monster tray.

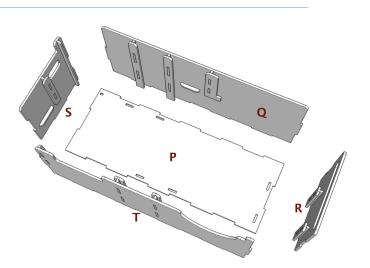

Building the Monster Tray - Attaching Rails to Walls

- 1) One by one, glue each of the eight rail assemblies to the outer walls as pictured on the left. Note that the brown rail assemblies extend into the base, so always ensure that the rounded end of the rail is on top.
- 2) Next, glue the two single rails (M, L) and the two single supports (O, N) to the outer walls.

Building the Monster Tray - Final

- 3) Next, place glue on the bottom of outer wall (\mathbf{Q}) and connect to base (\mathbf{P}) .
- 4) Next, place glue on the bottom and side tabs of outer wall (\mathbf{R}) and connect.
- 5) Next, place glue on the bottom and side tabs of outer wall (S) and connect.
- **6)** Finally, place glue on the bottom of outer wall (T) and connect to base (P).

Congratulations! You have completed the construction of your new storage insert. If you have any questions/concerns, don't hesitate to contact us. Finally, please take a moment to review your new solution on our website.
