RSUN-002 STORAGE SOLUTION

Miniatures Insert Kit for Rising Sun™ Daimyo Game Box Complete insert kit providing storage for miniatures, cards, and tokens

Construction Tips

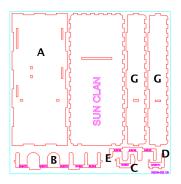

- 1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.
- 2) Our inserts are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.
- 3) Keep some paper towels handy for cleanup during build.
- 4) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored.
- 5) Check the build diagram included in the package for reference, including all parts, as well as build tips specific to this insert.
- 6) Always dry fit pieces first to ensure a good fit and to better understand how the kit goes together.
- 7) Allow your finished insert to dry overnight.
- 8) You can optionally sand and even stain your insert.
- 9) Don't hesitate to reach out to us if you have questions!

AGE 14+

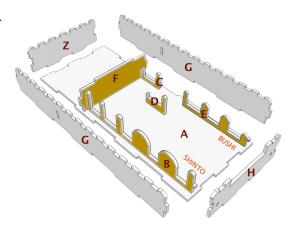

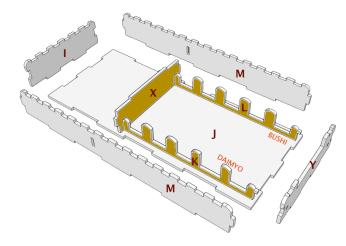

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray storage areas.

Building the Sun Clan Tray

This tray is specifically designed to store the Sun clan minis and extras.

- 1) Place base (A) down on your workspace in the orientation noted to the right.
- 2) Next, apply glue to the left side of mini bracket (B) and connect to divider wall (F). Repeat on the other side with mini bracket (C). Note: the etching faces inward for both pieces.
- 3) Next, apply glue to the bottom and side tabs of the structure you built in step #2 and connect to base (A).
- **4)** Next, place glue on the bottom of support (**D**) and connect to base (**A**). **Note:** the etching faces toward the center of the tray.
- 5) Next, place glue on the bottom of mini bracket (E) and connect to base (A). Note: the etching faces inward for both pieces.
- **6)** Next, place glue on the bottom of outer wall (**G**) and connect. Repeat on the other side.
- 7) Next, apply glue to the bottom and side tabs of end wall (\mathbf{H}) and connect.
- 8) Finally, place glue on the bottom and side tabs of end wall (Z) and connect.
- 9) Once the glue on your tray has had a few minutes to set, place the lid on the tray and allow it to dry.

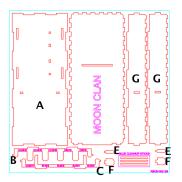

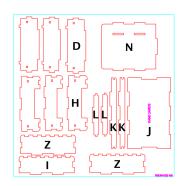

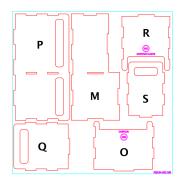

Building the Fox Clan Tray

This tray is specifically designed to store the Fox clan minis and extras.

- 1) Place base (J) down on your workspace in the orientation noted to the left.
- 2) Next, apply glue to the left side of mini bracket (L) and connect to divider wall (F). Repeat on the other side with mini bracket (K). Note: the etching faces inward for both pieces
- 3) Next, apply glue to the bottom and side tabs of the structure you built in step #2 and connect to base (J).
- 4) Next, place glue on the bottom of outer wall (M) and connect. Repeat on the other side.
- 5) Next, apply glue to the bottom and side tabs of end wall (H) and connect.
- **6)** Finally, place glue on the bottom and side tabs of end wall (I) and connect.
- 7) Once the glue on your tray has had a few minutes to set, place the lid on the tray and allow it to dry.

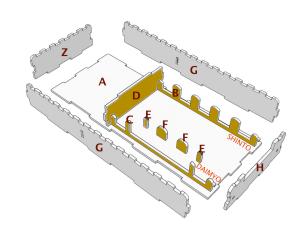

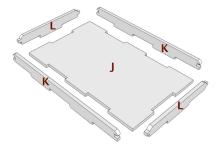

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray storage areas.

Building the Moon Clan Tray

This tray is specifically designed to store the Moon clan minis and extras.

- 1) Place base (A) down on your workspace in the orientation noted to the right.
- 2) Next, apply glue to the left side of mini bracket (B) and connect to divider wall (D). Repeat on the other side with mini bracket (C). **Note:** the etchings face inward for both pieces.
- 3) Next, apply glue to the bottom and side tabs of the structure you built in step #2 and connect to base (A).
- 4) Next, apply glue to the bottom of supports (E, F, F, E) and connect to base (A).
- 5) Next, place glue on the bottom of outer wall (G) and connect. Repeat on the other side.
- ${\bf 6)}$ Next, apply glue to the bottom and side tabs of end wall (H) and connect.
- 7) Finally, apply glue to the bottom and side tabs of end wall (I) and connect.
- 8) Once the glue on your tray has had a few minutes to set, place the lid on the tray and allow it to dry.

Building the Kami Card Tray

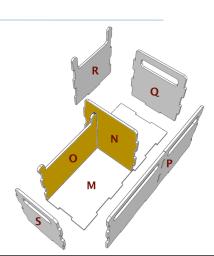

This tray provides storage for your Kami cards.

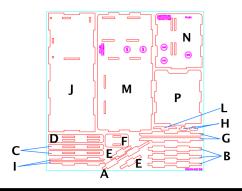

- 1) Place base (J) down on your workspace in the orientation noted to the left.
- 2) Next, apply glue to the bottom of long outer wall (K) and connect to base (J).
- 3) Next, apply glue to the bottom and side tabs of end wall (L) and connect to base (A). Repeat on the other side.
- 4) Finally, apply glue to the bottom of long outer wall (K) and connect to base (A).

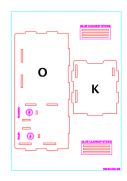

Building the Small Monster Tray

This small monster tray is used to store the Earth Dragon and the Daikaiju.

- 1) Place base (M) down on your workspace in the orientation noted to the right.
- 2) Next, apply glue to the right side tabs of outer wall (O) and connect to inner wall (N).
- 3) Next, apply glue to the bottom and side tabs of the structure you built in step #2 and connect to base (M).
- 4) Next, apply glue to the bottom of outer wall (P) and connect.
- 5) Next, apply glue to the bottom and side tabs of outer wall (Q) and connect.
- 6) Next, apply glue to the bottom of outer wall (R) and connect.
- 7) Next, apply glue to the bottom and side tabs of outer wall (S) and connect.

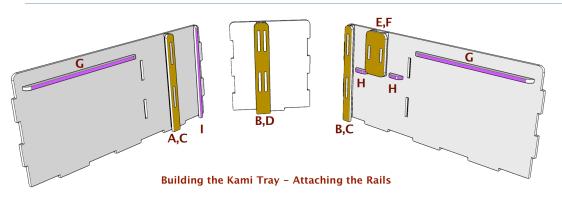

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray areas.

Building the Kami Tray - Rails

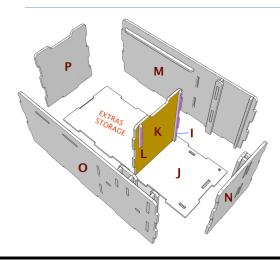

The Kami tray is designed to store the seven (7) Kami from the Kami Unbound expansion, the Kami cards, and also provides a large storage area for extras that you may not need due to token upgrades.

The Kami tray makes use of rail assemblies which are comprised of a support and a rail as illustrated on the right. When building the rail assemblies, make sure you clean up all excess glue and note that the rails are always rounded on top. Also, in cases where the rail extends to the base, the rail will actually slide into a notch on the base. This provides additional stability to the finished tray.

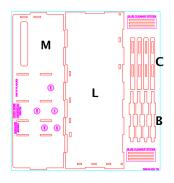

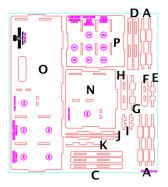

- 1) One by one, glue each of the four (4) rail assemblies to the outer walls as pictured above (brown highlights).
- 2) Next, glue the one single rail (I) and the four (4) single supports (G, H) to the outer walls (purple highlights).

Building the Kami Tray - Putting Everything Together

- 3) Next, apply glue to supports (I, L) highlighted in purple and connect to divider wall (K).
- 4) Next, apply glue to the bottom and side tabs of divider wall (K) and connect to base (J).
- 5) Next, place glue on the bottom of outer wall (M) and connect to base (I).
- 6) Next, place glue on the bottom and side tabs of outer wall (N) and connect.
- 7) Next, place glue on the bottom and side tabs of outer wall (O) and connect.
- 8) Finally, place glue on the bottom of outer wall (P) and connect.

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray areas.

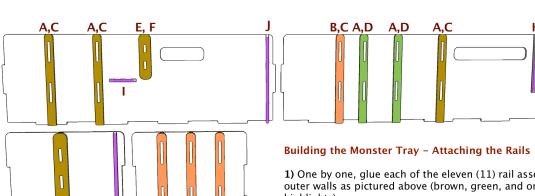

Building the Monster Tray - Rails

G, H

The monster tray makes use of rail assemblies which are comprised of a support and a rail as illustrated on the right. When building the rail assemblies, make sure you clean all excess glue and note that the rails are always rounded on top. Also, in cases where the rail extends to the base, the rail will actually slide into a notch on the base. This provides additional stability to the finished monster tray.

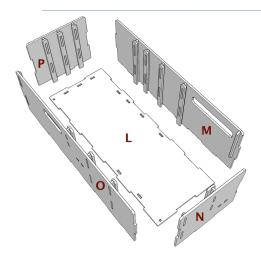

B,C B,C B,C

1) One by one, glue each of the eleven (11) rail assemblies to the outer walls as pictured above (brown, green, and orange highlights).

2) Next, glue the three (3) single rails (J, J, K) and the two (2) single supports (I, I) to the outer walls (purple highlights).

Building the Monster Tray - Putting Everything Together

- 3) Next, place glue on the bottom of outer wall (M) and connect to base (L).
- 4) Next, place glue on the bottom and side tabs of outer wall (N) and connect.
- 5) Next, place glue on the bottom and side tabs of outer wall (P) and
- 6) Finally, place glue on the bottom of outer wall (O) and connect to base.
