

RSUN-004 STORAGE SOLUTION

Miniatures Insert Kit for Rising Sun™ Monster Pack/Kami Unbound Game Boxes
Complete insert kit providing storage for miniatures and cards

Construction Tips

- 1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.
- 2) Our inserts are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.
- 3) Keep some paper towels handy for cleanup during build.
- 4) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored.
- 5) Check the build diagram included in the package for reference, including all parts, as well as build tips specific to this insert.
- 6) Always dry fit pieces first to ensure a good fit and to better understand how the kit goes together.
- 7) Allow your finished insert to dry overnight.
- 8) You can optionally sand and even stain your insert.
- 9) Don't hesitate to reach out to us if you have questions!

Made in the USA

NOT A CHILDREN'S TOY

AGE 14+

Build Instructions

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, clean up excess glue to ensure a proper fit and finish, especially in card, rail, and tray areas.

Building the Kami Card Tray

This tray provides storage for your Kami cards.

- 1) Place base (A) down on your workspace in the orientation noted above.
- 2) Next, apply glue to the bottom of long outer wall (B) and connect to base (A).
- 3) Next, apply glue to the bottom and side tabs of end wall (C) and connect to base (A). Repeat on the other side.
- 4) Finally, apply glue to the bottom of long outer wall (B) and connect to base (A).

Building the Mini Tray - Rails

The mini tray is designed to store the seven Kami from Kami Unbound and the four monsters from the Monster Pack.

The mini tray makes use of rail assemblies which are comprised of a support and a rail as illustrated on the right. When building the rail assemblies, make sure you clean all excess glue and note that the rails are always rounded on top. Also, in cases where the rail extends to the base, the rail will actually slide into a notch on the base. This provides additional stability to the finished mini tray.

Build Instructions

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray areas.

B - Etched Side

B - Non-etched Side

Building the Monster Tray - Attaching the Rails

- 1) One by one, glue each of the thirteen (13) rail assemblies to the outer walls as pictured above (orange, green, blue, purple highlights).
- 2) Next, glue the three (3) single rails (light blue, P) and the one (1) support (brown, O) to the walls.

Building the Monster Tray - Putting Everything Together

- 3) Next, place glue on the bottom and side tab of inner wall (B) and connect to base (A).
- 4) Next, place glue on the bottom and end tabs of outer wall (C) and connect.
- 5) Next, place glue on the bottom of outer wall (D) and connect.
- 6) Next, place glue on the bottom and end tabs of outer wall (E) and connect.
- 7) Finally, place glue on the bottom of outer wall (F) and connect to base (A).

Congratulations! You have completed the construction of your new storage insert. If you have any questions/concerns, don't hesitate to contact us. Finally, please take a moment to review your new solution on our website.
