ZGH-002 STORAGE SOLUTION

Storage Kit for Zombicide: Green Horde™ Horde Box
Complete insert kit providing storage for minis, ID cards, and small cards from the Horde box

Construction Tips

- 1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.
- 2) Our inserts are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.
- 3) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored.
- 4) Check the build diagrams included in the package for reference, including all parts, as well as build tips specific to this insert.
- 5) Always dry fit pieces first to ensure a good fit and to better understand how the kit goes together.
- 6) Allow your finished insert to dry overnight.
- 7) You can optionally sand and even stain your insert.
- 8) Don't hesitate to reach out to us if you have questions!

NOT A CHILDREN'S TOY AGE 14+

Build Instructions

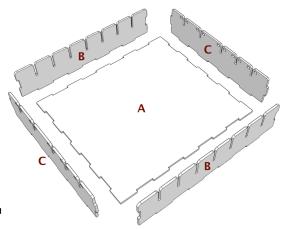

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray storage areas.

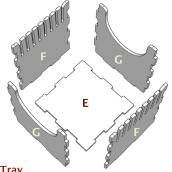

Building the Small Minis Tray

This tray stores minis individually or in groups and supports name tabs.

- 1) Place base (A) down on your workspace in the orientation noted.
- 2) Next, apply glue to the bottom of long outer wall (B) and connect to base (A).
- 3) Next, place glue on the bottom and side tabs of outer wall (C) and connect. Repeat on the other side. Note: please ensure you orient these two walls the same.
- **4)** Finally, apply glue to the bottom of long outer wall (**B**) and connect.
- 5) Once your tray has had a few minutes to dry, place a few of the long inner walls (not shown, located on plate #4) in the tray. Note: please ensure you orient these two walls the same. This will ensure a perfect fit once dry.

This kit also offers short splitters (**D**) and long splitters (not shown) for this tray. Once your tray has dried and you have decided how you want to store your minis, you can glue the long inner walls (not shown, located on plate #4) and splitters into your tray.

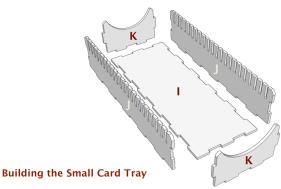

Building the ID Card Tray

This tray stores ID cards, unsleeved.

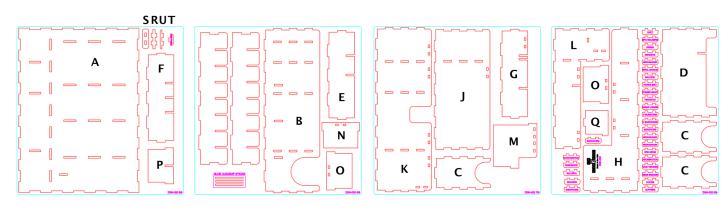

- 1) Place base (E) down on your workspace in the orientation noted.
- 2) Next, apply glue to the bottom of outer wall (F) and connect to base (E).
- 3) Next, place glue on the bottom and side tabs of outer wall (G) and connect. Repeat on the other side.
- **4)** Finally, apply glue to the bottom of outer wall (F) and connect.
- 5) Once your tray has had a few minutes to dry, place the dividers (H) in the tray. This will ensure a perfect fit once dry.

The tray stores sleeved or unsleeved small cards.

- ${f 1)}$ Place base (I) down on your workspace in the orientation noted.
- 2) Next, apply glue to the bottom of long outer wall (J) and connect to base (I).
- 3) Next, place glue on the bottom and side tabs of outer wall (K) and connect. Repeat on the other side.
- 4) Finally, apply glue to the bottom of long outer wall (J) and
- 5) Once your tray has had a few minutes to dry, place a few of the dividers (L) in the tray. This will ensure a perfect fit once dry

Build Instructions

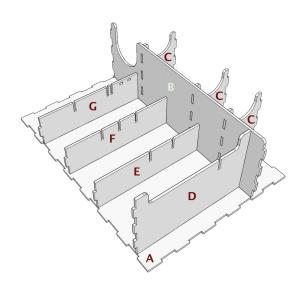

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray storage areas.

Building the Base Insert

The base insert is designed to store your minis.

- 1) Place base (A) down on your workspace in the orientation noted.
- 2) Next, apply glue to the right side tabs of inner
- divider walls (**D**, **E**, **F**, **G**) and connect to inner wall (**B**). **3**) Next, apply glue to the left side tabs of inner
- Next, apply glue to the left side tabs of inner dividers (C, three total) and connect to inner wall (B).
- 4) Next, apply glue to the bottom of the structure you just built and connect to base (A).

Building the Base Insert (cont'd)

- 5) Next, apply glue to the left side tabs of inner divider walls (D, E, F, G) and the bottom of outer wall (H) and connect.
- **6)** Next, apply glue to the right side tabs of inner dividers (**C**, three total) and the bottom of outer wall (**K**) and connect.
- 7) Next, apply glue to the side tabs of inner wall (B) and the bottom and side tabs of outer wall (J) and connect.
 8) Next, apply glue to the side tabs of inner wall (B) and the bottom and side tabs of outer wall (L) and connect.
 9) Next, apply glue to the bottom and side tabs of inner splitters (M, N, O, O, P, Q) and connect.
- 10) Next, apply glue to the side tabs of support (R) and connect to support wall (S) and glue to outer wall (L).
 11) Next, apply glue to base support (T, Werezombie
- etching) and connect to outer wall (L). Note: cleanup ALL excess glue!
- 12) Finally, apply glue to rail (U) and attach to outer wall (K). Note: cleanup ALL excess glue!

Once you have decided how to store your minis, you can glue the name tabs into each tray.

Congratulations! You have completed the construction of your new storage solution.
