

AHL-001 STORAGE SOLUTION

Storage Kit for Arkham Horror LCG™ "Return to" Boxes

Complete insert kit providing storage for cards, including fourteen (14) dividers, with support for the included divider cards

Construction Tips

- 1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.
- 2) Our inserts are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.
- 3) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored.
- 4) Check the build diagrams included in the package for reference, including all parts, as well as build tips specific to this insert.
- 5) **Always dry fit pieces first** to ensure a good fit and to better understand how the kit goes together.
- 6) Allow your finished insert to dry overnight.
- 7) You can optionally sand and even stain your insert.
- 8) Don't hesitate to reach out to us if you have questions!

Build Instructions

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray storage areas.

Building the AHL Tray

The AHL card tray is designed to store cards and supports the divider cards supplied in the "Return to" expansions. This tray has 5mm legs and supports being removed from the box, as needed. The dividers are supplied primarily to allow you to stabilize your cards until you fill the entire tray.

- 1) Place base (A) in the orientation noted.
- 2) Next, place glue on the left side tabs of base (A) and connect long outer wall (B). Repeat on the other side.

Note: one of the end wall (C) pieces has the Go7 logo and model number of this kit. You can choose to face this wall inward or outward, based on your personal preference.

- 3) Finally, apply glue to the side tabs and bottom where the end wall (C) touches base (A) and connect. Repeat on the other side.

- 4) After your tray has had a few minutes to dry, place a few dividers (Z) in the tray to ensure a perfect fit and then allow your tray to dry overnight.

Congratulations! You have completed the construction of your new storage solution.
