

STARC-003 STORAGE SOLUTION

Storage Solution for Starcadia Quest Large Expansion Box

Complete insert kit providing storage for minis

Construction Tips

- 1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.
- 2) Our inserts are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.
- 3) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored.
- 4) Check the build diagrams included in the package for reference, including all parts, as well as build tips specific to this insert.
- 5) Always **dry fit pieces first** to ensure a good fit and to better understand how the kit goes together.
- 6) Allow your finished insert to dry overnight.
- 7) You can optionally sand and even stain your insert.
- 8) Don't hesitate to reach out to us if you have questions!

Build Instructions

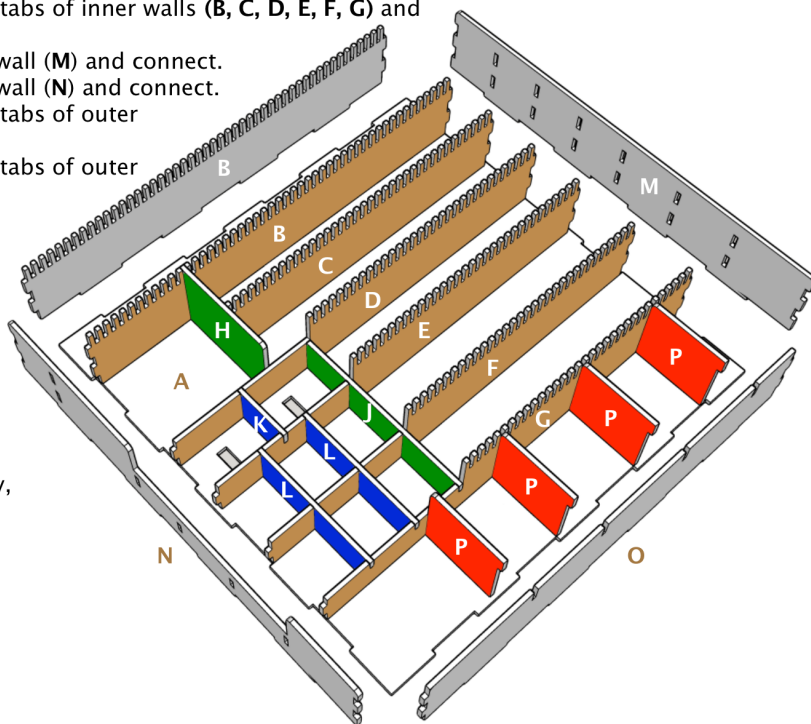

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray storage areas.

Building the Main Insert

The Main Insert provides storage for large and small minis and has dividers so that you can customize the amount of space needed for each mini.

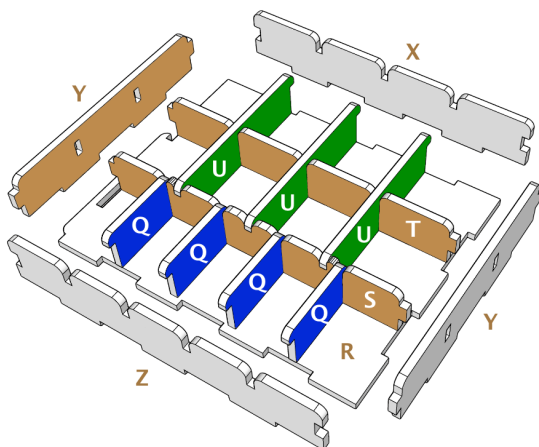

- 1) Orient base (A) as illustrated.
- 2) Next, apply glue to the bottom and side tabs of inner walls (B, C, D, E, F, G) and connect to base (A). **{brown}**
- 3) Next, apply glue to the bottom of outer wall (M) and connect.
- 4) Next, apply glue to the bottom of outer wall (N) and connect.
- 5) Next, apply glue to the bottom and side tabs of outer wall (B) and connect.
- 6) Next, apply glue to the bottom and side tabs of outer wall (O) and connect.
- 7) Next, apply glue to the side tab and bottom of the divider walls (H, J) and connect them. **{green}**
- 8) Next, apply glue to the side tabs and bottom of the divider walls (K, L, L) and connect them. **{blue}**
- 9) Finally, apply glue to the side tabs and bottom of the divider walls (P, P, P, P) and connect them. **{red}**

Once your insert has had a few hours to dry, you can figure out how you want to store your minis and glue the bottom of each divider and place them.

Building the Small Minis Tray

This Small Minis Tray is for storing robots.

- 1) Orient base (R) as illustrated.
- 2) Next, apply glue to the left and right side tabs of inner walls (S, T) and connect to outer wall (Y). **{brown}**
- 3) Next, apply glue to the bottom of the structure you built in step #2 and connect to base (R).
- 4) Next, apply glue to the bottom and side tabs of outer wall (Y) and connect.
- 5) Next, apply glue to bottom and side tabs of divider walls (U, U, U) and connect. **{green}**
- 6) Next, apply glue to bottom of outer wall (X) and connect.
- 7) Next, apply glue to bottom of outer wall (Z) and connect.
- 8) Finally, apply glue to bottom and side tabs of splitters (Q, Q, Q, Q) and connect. **{blue}**
