ANKH–001 STORAGE SOLUTION

Organizer for Ankh base game + Pharoah expansion
This kit provides storage for cards, minis, boards, and tokens

Construction Tips

1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.

2) Our organizers are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.

3) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored.

4) Check the build diagrams included in the package for reference, including all parts, as well as build tips specific to this insert.

5) **Always dry fit pieces first** to ensure a good fit and to better understand how the kit goes together.

6) Allow your finished insert to dry overnight.

7) You can optionally sand and even stain your insert.
