

MD2-005 STORAGE SOLUTION

Organizer Compatible with Massive Darkness 2: Demon Dragon box

This kit provides storage for cards, tokens, and minis for the expansions: Feyfolk, War of Souls, Bards, Druids, Monks, and Demon Dragon.

Construction Tips

- 1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.
- 2) Our organizers are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.
- 3) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored.
- 4) Check the build diagrams included in the package for reference, including all parts, as well as build tips specific to this insert.
- 5) **Always dry fit pieces first** to ensure a good fit and to better understand how the kit goes together.
- 6) Allow your finished insert to dry overnight.
- 7) You can optionally sand and even stain your insert.
- 8) Don't hesitate to reach out to us if you have questions!

Build Instructions

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray storage areas.

Building the Main Insert

The Main Insert is designed to hold minis and two small token trays. The map tile in this expansion (1) should be stored on top of these trays (2mm lift) or with other map tiles in an extra box (Rainbow). All etchings and logos should face into the box allowing you to easily read them while looking for minis. You will want to dry fit everything to ensure proper etching orientation.

Next, place the Large Mini Tray (E) on top of the other trays. This tray also seats using two notches. Wiggle the tray around a little to get it to settle properly.

Step Three:

Next, place the Card Tray (F) and the Token Card Tray (G) in the box. These trays also seat using notches. Wiggle the trays around a little to get them to settle properly.

Step Four:

Finally, place thick and thin boards on top, making a level surface and then place the game manuals on top. If you omit the map tile (by placing it in the Rainbow box), you should be able to close the lid and experience zero lift.
