

MD2-006 STORAGE SOLUTION

Organizer Compatible with Massive Darkness 2: Rainbow Crossing

This kit provides storage for one set of each terrain from the KS + 9 map tiles

Construction Tips

- 1) Each piece should be removed from the frames with gentle pressure back and forth. You should not need a knife to cut pieces free.
- 2) Our organizers are designed to be glued together. We use Sobo craft glue, but any glue that is tacky and dries clear will work fine. Tacky glue assists with building as it holds better during construction. You can use painter's/masking tape for some joins, but glue is always best.
- 3) Ensure you cleanup excess glue as you build. This is especially important in card lanes where dividers will be used or in spaces where a tray will be stored.
- 4) Check the build diagrams included in the package for reference, including all parts, as well as build tips specific to this insert.
- 5) **Always dry fit pieces first** to ensure a good fit and to better understand how the kit goes together.
- 6) Allow your finished insert to dry overnight.
- 7) You can optionally sand and even stain your insert.
- 8) Don't hesitate to reach out to us if you have questions!

Build Instructions

PLATE #1

PLATE #2

PLATE #3

Please reference the diagrams to understand how each component fits together. Also, dry fit the pieces to understand how it goes together and ensure everything is oriented properly before applying glue. Finally, cleanup excess glue to ensure a proper fit and finish, especially in card, rail, and tray storage areas.

Building the Main Insert

The Main Insert is designed to hold one set of each terrain set offered in the Kickstarter, plus 9 large map tiles on top of the tray.

- 1) Orient base (A) as illustrated.
- 2) Next, apply glue to the bottom and side tabs of inner walls (B, C, D, E, F, F, F, G) and connect to base (A). The logo on splitter wall (G) should face towards the (H) wall. {brown}
- 3) Next, apply glue to the side tabs and bottoms of outer walls (J, L) and then connect to base.
- 4) Next, apply glue to the bottom of outer walls (K, H) and connect.

5) Finally, per the image on the first page of the instructions, you may want to cut a map tile removal slot in your box. We simply seated the main insert in the box, measured out a couple of inches to cut away in the center on one side of the box, and used a hobby knife to cut downward twice, and then cut across to create the cutout. We then sealed the cut area with packing tape to extend the life of the box in the cut area.
